#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 26 January 2004.  
 2a) This action is FINAL.                    2b) This action is non-final.  
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

## DETAILED ACTION

### ***Election/Restrictions***

Newly submitted claims 6 and 7 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the inventions claimed in claims 1-5 and 6-7 are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the, process could be practiced with a folded out paper bag with a piece of adhesive tape stuck diagonally on one side, or alternatively the bag claimed in claim 1 could be used by punching a hole in the bottom of the bag and allowing the contents to pour out.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 6 and 7 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 recites the limitation "the contents" in line 3. There is insufficient antecedent basis for this limitation in the claim. Furthermore, it is unclear whether or not Applicant is positively reciting and claiming contents inside the bag.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Kristensen. Regarding claim 1, Kristensen teaches a bag having heat sealed parts 28, 30 formed at left and right side edge portions and a bottom portion that is closed up, wherein at the top of the bag a first heat sealed part 42,38 that closes up a top opening 43 is formed along an upper edge portion (portion of 42,38 along top edge) and a second heat sealed part 37 formed diagonally to extend from the first heat sealed part 42,38 to one of the side heat sealed parts 30, wherein the bag may be opened in the manner claimed. Kristensen clearly teaches the limitations of claim 2. Regarding claim 5, see item 36.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kristensen in view of Official Notice. Kristensen teaches all the limitations of claims 3 and 4 except the bag containing cleaning agents or chemicals in the form of powder or lumps. Official Notice is taken that bags containing chemicals are old obvious and well known. Furthermore, bags containing chemicals in the form of powder or lumps are also old obvious and well known in the packaging arts. It would have been obvious in view of Official Notice taken to one of ordinary skill in the art at the time the invention was made to put powder or lumpy chemicals into the bag of Kristensen, as it is well suited for such usage.

***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection. It appears that several other references newly cited teach most of the structural features claimed in the claims as well.
